of the brain and news of there are hourd instances of hiside to danving followed a post and his followed a post a po high tive of joy. Low endinest hunghim. - self som after he succeeding a large es: - tate - The Son of the late Duke of Guerns. -berry that himself a few days lefter the completion of every desire of his heart in the possession of an aniable young wife. doid bombury - hung himself theire.

V Joy is most intense, that the existability of the hystem has been accommodated by previous bear. The Jordian Chris Logan dulares in the Jamono Spench preserved by mostferson in his notes that he knew not the joy of fear! - I will recollect to have seen this combination of joy with fear examplified of the Iffians at Frenton and the 30 form 1796. Uspen In telling the Story to me after. swards - he said he had never felt a raptime equal to what he felt when he saw the Supians lay down their arms. He did not suspect that in this declaration he consepted that he had been under the influence of pre-Pope Lio the x died of a sudden paroxyism of malignantjoy upon heaving of a great Culamity if had demored to the funder Librits died of

after he was proclained grannond The york- and two persons are upon after Francing high prince in a lotting. This papion was implanted in our minds for wise and neupany purposes. Its exupo both in degree and direction are happily forbidden in the following precepts of 29. " Be angry & sin not" and "Let not the den degnes in the from of fun, ruse the will be droper. a powerful thimselver - It to determines the blevd to the brain - producing tringescence of the vefsels - redness of the uses Oface - a bluring at the nose - an energy function

June up on opening an old thest that havingwhich he rinexpertedly found a large quantity of gold. Dess die of Jay. V Tipot relates a flory of a Schoolmas ter who always has a flood immediately after being wered by had Conduct in any of his Scholars.

of Saliva - a foaming at the months - quit bolubility or a Suppnepion of pech - agita. tions of the fist - Stamping of the feet uncommon Strength of the body - convulsions - hystica, - apoplay - & death. Two instances of the latter have occurred in this city - the Due in an old german thormation who persound a brumber of she boys to punish there for blowing the Inshe of tobacco into his little cabin thro the new role of his door - the other was in a miser who fell diad in a paroyeson of anger istate he was complaining of the weight of his was owned with I himmely owned lately from anger in north? White larger is combined with fear it produces tremors - grich & difficult breathing - dichness at Stomach - with an occasional puting of bill - faintness -

V The Disposition of grief to suspend all motion is happily illustrated in the by the Story of who leter living all her Children became motroness & was after ands metassorphoosed into w rock. Offing lihewise produces = 4 milled for

Symon - asphinia - & Death. The duties of our profession require is frequently to witness this passion. - It is of consignence therefore - that we thall be well orgunisted with the diseases which are produced by it - fatso with the meth? profipion to mathie of physic. Its effects on the System are distriping, and often fattle Synerge - and asphiticu, -Int it wor frequently produces freeze V Dyspepsier- Toypocondianis - cutalipsy marria de death. Dissettino there the heart to be offerted lefter death - by Congestions-Inflammations - & negotimes of its alemades I benticles. - It inspains the memory . It It is unashable that Grif when

it attacho persons deligent to the byste. nia, often changes the Physteria into the Approconditions. - The reason of this the unge will be obvious to you when I deliver the propriete course of those two very plain - but much mis taken Locaro generally aurmpany grief, but it is only when it is moderate . When it is very intense - tears refuse to flow. of this history Junishes no with a very pathetie example. Psammanitus one of the kings of Egypt, with his fon- Imighter I hnant were taken prisoners by Cambysis King of Simila. Soon after his captivity he see beheld his daughter in the habit of a Sewant to Draw water . This fight drew tears from the alterdants, but down " V Romeo leves lognantes, ingentes Stripent's De Wendwille & m mickling lases.

no emotion in the king of Egypt. fromedic eatily afterwards he saw bisfor conducted to a place of execution. This fight he like: : vice beheld without a tear. This bonant mest appeared for before him among a munteer of cupstions. - This light of ourseme him - and be bristed into a flood of tears ] - Thou shall we accome for this fact? - I amount, that there is in the often Laurymal sus a certain musping point - above and below which, the ties refuse to flow. It awards with The Hupsing point - above & below which slupe represents take place on english. The dight of the distress of a belove franghter I for in the case which has been mentioned reduced the grief of the king

V you will now see the news our why His beautor below the waying point. Tens flow - when grid less women peffestest from it. the same thing may be said of distress from allits causes, the same thing may be said of distress from allits causes, this explanation of the behaviourement of Sleys in profound of rief, will sure to polliste the Conduct of the disciples of vir faviour who safet during his grony in the garden. It did not arise from the Want of ympathy but from an irresistable law of the animal buonomy.

of Egypt below the meeping point - the dight of his drunt being an abstraction of less Himmhus, than the two former Sums, raised his hystem to the point at which alone tears usually flow . we see Something estain assalagons to this happen in bamor. - shages . Twhen the delitity which produces them promise on fresh hypropre - the blood ceases to flow - but returns again as won as the system vises to a left digree of delility of -There is One more fact with respect to grief which deserves to be noticed, & that is that, persons who are under the clarge grief often ex olugo more loverdly than before they were affected by this papion. - The reason is obvious. The griefreduce -ces the dystern to the Herping point +

V Besides these general effects of the bed upon the whole hystern - it produces a great change not only in the Counterrance, but in the features of the face. It enlarges & deprepres the lower life, and by It Cohumise depositions the Beechs, and thereby causes the check lones to project appear more projected than is natural to them - It wrinkles the forehead - and imports a languid, and dijected down cast look to the eyes - all these pendinsities of feature be Inentenance give the face an applicarance that I promotegale that I for molegale that the face of own blopsed was that An Javique and the state of the same of the deformed not only from his the account, Shat is given, lime "that he was a man of Jonows & acquainted with grief," but from Ather insumstances which are related of the was foretoto that the le marred more him. His or face in said to be marred more than any other mans, I again, we are total that there would be no comeling in him from wherely he should be desired. - His The

It is only them grief sinhs the hystern below the sleeping point that it produces Obstriate & moshird walufulness. Fear Think from There is so much wil & danger in our world, that the papion of fear was implanted in our minds for the wise de weeful purpose of defence The thing has from them In Deministration of the standing of t it exists where there is no will or danger, or when the prifice of wil or danger in an excepive degree. The modio effects of fear on the hystern are paleness tremors - quichants pulse - and respiration - a Short Cough - globus hysteri: 2 cus - a copsione discharge of bale Urine -wer on Des & wolves - a suspension of la torpains - The four thrown or lametimes la torpains involuntarily afaces & Urine aphonia - asphitia - amnesia - Epilepsy -

appropriate of a formisture old age in his face may naturally be inferred from the speech of the Phonisus to him " There are not yet 50 years old, & hast seen abraham". One the was that that hime a only trained of 30. The cost of constitutioned to partition of the - which has been lisinful was confined wholly to reason the were often obscined in the prespect, on beginning of a battle during the late bear. They approved liberise after a de. feat - hence I well recollect - the frist often the bounds of a flying Soldier was But the effects of fear go firsther, To as to determines induce not only forest debility, but actual pain. I have known veneral pains in the nose of legs counterfeited by it, and I am disposes to believe than the pain, de Inhoegnent destructive effects of Can -cers are often produced to encreased by fear determining delility to the part.

bloods hvents - in a gulde 292- Me 19:139. 1906.

Instances of every Dis affection that has been mentioned, from the influence of feer are to be met with in the seconds of medicine. many of them have accorded within the Course of my own observation. V and terrorthy and terrorthy and to sets in or very singular manner upon the hair of the head. , It causes it to rise from a ratural to a perpendientar State. Vigil Ishahespears descriptions of this ; shanomeron as connected with fear are too common to be mentioned: 2. I have heard of a man whose hair became grey in one night, from a brolent parvagion of fear. I de ma Bondinst ter. infried at Sea by rato! 3 Dr School informed me that he saw a Gentleman in Portugal who was bald who

= period of our Inviour's humiliation por no downer and did he complete the great rection from the grave, than the resummed its lair, original beauty; and this I take to be reason why his disciples did not know him notwithstanding they walked I talked with them Somer friend, be master. It would seem

from this fact, that deformity was the consequence of fin, and that our faviour in aporning the quiet of man, did not Jorget that digrading and offensive mark of his rebellion against his creator.

Thereffects of this fear are least felt, when least is said about them . Speech gives force beeningy to every feeling. Hippo Boys will walk with some Courage by a grave your after right Invided they do not express their fears to each other, but talk of other things than the Objects around them.

Thory of gen miranda, & Chatelet. Their pains

- Il isoporondriae people feed their pains Hacks and all their distripes, by talk. ing about them, - hence the advantage of sending them abroad among strongers, who are not interested in listning to their Complaints. I know an asthmatic gutteman in this city who appured me that he felt his asthina least when he complained

informed him that he lost all hishair of head in a few hours by the fear existed in him by the great Easthqueshe which distringed the city of dis low in the year 1755. The influence of fear upon the mind is worthy of over notice. They not only suspends and destroys memory and Understanding when violent - but it deposes been anni: - hilates for a while all other papions. a panic struck Soldier in retreating after a defeat, often leaves his lest friend, and com butter to periol on the field of battle without making a single effort to save his life. nay-further-fear of Some-: times annihilated even the desire oflige; The Chinese in flying from the Farturs After a defent, three themselves into a rin wint penaled, to avoid thertwoods of their

hast of it, and for that reason never wished to be interrogated about it. - an important hint this gent. to Physicians! - while on the one hand we leget confidence by a propsen attention to all this Lympstoms, we certainly leget fear, and thereby en-: crease or forces debility & morbid action, by too minute and too brequent ingrisies into be communations about ivery Sympotom of their dis cases. This fact of the influence of Speech upon Insility is of great applica.

as will as medicine.

tion in morals, benereal disires are more in flamed totring threed by Commissation - so is avanice - and

The effects of fear are more violent in Insportion as they are combined with Thame a quiet of have known two sine edtances of ressours folling down hadenly on a floor upon being modernly detected in Stealing - The one into convelsions - the Other into hyncopse. The latter would proba. - bely have died, had he not taken Land int other timulating remedies. This fact may Tense to excelpate the Aprostle Peter from the charge of a virious act which has been unged both against his character, & the binustent Spirit of histiamity. After Amouras had baleen down lead in consequence of laving hed: -denly detected in a most imprious francis of frand, and lying, & Peter, presiets from what he had just seen, that the same wort would follow the detection of Suprhises in as

every other passion that produces painte disorder in the mind. V Frear operating with delet produces all the diseases of the running ystem. Debt(says mr Busga) is a realevil! many - many presons I believe have been surificed to it in all those countries, when the itis primished by a jail.

an acomplie in the same Crime, Be - Lold said he, the feet of there which haveburied. Ity bushand, are at the down, & shall carry thewort! . The death in this case was theeffect of polarious merely physical, and is no means a vindictive Isirit on to to be experied to the influence of a suprema: - tural power. -- V In abouting that fear modered delility, I have been asked to assount for the won: -disful explorts of persons who have been under the influence of the fear of thankor of bain - or death. To this I amount - that? the papion of bear - like all the papions which have been mentioned is Julijut to combination with other papions, which produce are opposite offect upon the listy. Frear produces an accumulation of excitability in the lysten, but with this the los counter papion of the disire of life

From anto with perior of so oftenor I admit to act the body as aftimulant of formerly the body as aftimulant on formerly that parlessition of ten induced by Vothere is an effects of of oftenor Strong rights probably from the terror indueld by it. a Sca lagstain in this lity left: Bure once brought bis Ship full of papengen from Island. During a biolent gale of wind fine women were delivered of Children Forer of Whorr to Tenor: But Baron Stolberg in his travels mentions à still more extraordiary instance of tenor induced by un earthquake at oppside in Staty on the 5th of Duren 1783 inst only upon partirition back upon Generation From

- the love of glory - or of a just reportation, act with redombled force - and hence cowards often proform quater exploits of balor than brave men - and hence men Insform feats of strength in a battle which they are wholly uniqual to, whentheir boris and not predisposed, to by the previous Lexistability & debility of fear. The actions here due of a convulsive nature from the disproportion of Himmeless to existabilityhere the whenever & Strength - as in They are the reaction of the Suptem in flam former airid tonic madries into enfotion of country which is fear in a winter that. it offen modures different effects awarding to the texture of the knind on which it operates, - when it combined with anger it produces gnot Aringth, and even acts of wigh Tomage . - )

2 years afterwards the woman of that town cother did not concerne, Such as did either what abortive, or till bonn Children, or if the Children com beom at the trabasal period of yestation, They all died sown afterwards But tenor Ises more, it possbato or suspend, surrel familles of min - 24 congress - Cally Olishunder - Again Terre returned to the feether as Chining The worderful exploits of activity of trength passormio by persons who have escaped from Deather Shipwreek - carthyrushes & fire are the effects of the reaction of the fystem into the constitutes by fear terror the Stimulating emotions of fees terror . The

I have their overtimes the effects of the principal and most common propions on ch the broy . - But there are many others which have not been mentioned which act on In body. Envy is like a prespetual blister or if we, according as it approaches nearing or is kipst at a greater chotenes from the Object which excites it. It belongs to this papion frags Lord Bacan to know no holidays. and wen of professional professional by the seeset and undermining influence of this papion on the body. ambition is an inflami form in The mind, and by them by its vacy of time Induce diseases for it com feeds upon constant & onceprire gratifications. But

customent of the families of the enind is these cases feems to pays into the Imuseles and hence we find persons under the in: - Shower of those in escaping from langer Discours a great want of morning, and judgement, and sometimes a total Cop of Incomory. In the bistory of the Destruction of Calloo by inforth america by an Earth: = grade we are told - several people were found upon the soofs of houses who loud not lett whethy they came there of themselves, or were thrown there by the conversions of the earth.
The propers tett us that the from the conflagra. - bion of the Theatre at Richmond with two Children in his Armo, would not tett land the door of the theatre, nor son of any thing that paper between the moment It is to have accomplished what he did,

its errortifications & disappointments are often attended with as not only chronic with with acute diseases, and even death itself. a minister in Incour dies with a Colic a for days ofter he was displaced by his king, and a late fraveller into Italy tells in that it is no uncommon thing for one or two Cardinals to die of disappoint of withint a short time after the election of a Josse Quaries does not often preque disures unlife it discurdants of towest digace of dissince itself of noupary food or elasthing. There is a currious Scale in this papion In considering the discases foroduced by armie, it will be riscepany to de: - riche the Scale on which its different digrees are graduated. This first degree,

for beyond its ordinary state. -

it abstracts what is dire to the whole world - next, that which is thee to country then neighbourhood - Her nest ale re: mote relations - then family lements -next wife - last but love - bis Children -chiefly and friedly its burn Self. It is world when avanice robs itself of necessary ford or cloutting, that it produces dis. : enses. Enany instances are take met with of men who have died, to use as unlyar saying, in debt to their backs and this lesslies. On Epitaph on one of the archbishops of Canterbury has happily expreped thesebaneful consequence of avanie, " Itere lies his grace, in cold clay clad, or what he had. There is one more case in which avance Inoduces disease, and that is when it is nobled of its the Object of its affections. many

- bed a shall give your extracts from - stroyed by it, I shall relect two extracts. In come of them Dates Du 1. 18ds from South Carolina, the history of a young man addicted to this Vie is given in the following words." He complains that his memory is impaired, his eyes are week, his complexion is sallow, - his fleshoft, and flabby, of which he has but little bring very thin, - he fuls a weakness in the small of his back, - his testicles are senall Greland, - he discharges byson the most trivial effort or initation a kind of liquid Serven - he has frequent noctumal enripions; is very melancholy- and It avoids Company, &

the whole of his thoughts are also shed by deflections upon himself! In Another · letter from Vriginia dated Dee 70. 1807 are the following history of the offects of the Vis I have mentioned, written by the person who felt them. "I rest books at nights, and am musch troubled with Dreams. I have figuent noithernal creeking - one which are accompanied with a fensa - tion of Uneasines, instead of desire orphia. - Juse, and from Dreams, frequent emissions take place which are much more fluid Than Joseph The testicles fuguently Jul a tensation similar to that produced by small inserts crowbing over them. The external organs of generation have a number or dead feeling. The lower part of my back is very weak . my cyco are

Aften parinful, and my eye lids Iwelled and red. I have about a continual low, and oppnepion at my ftomach. On you Dear his all my remaining hope of hopspiness depends. In Short, I had rather be laid in the Dilent bourt, & encounter that theadful uncertainty hereafter, than this remain in my present unhapopy & degraded fituation. These are humilitating Confessions, and it is extremely painful for me to make Them, but let my well ancholy lituation be my apoligy for them." In some of the histories of the effects of manism matis communicates to me by letter, the writer of it says that the practice had become to habitual

V But ananism does not stand alone as the cause of Diseases. The following extract of a letter from a physician in majsachufuts of the Syst 24. 1793, and the excepive indulgence in Veneral pleasures when touped enjoyed in a lawful way sometimes attended with moshid effects. The gentleman whose case says the physician is now submistato yon, is about 25 years of age-meagreglooning and restless - has a bad lover tenance, and a lax state of his bowels. He importes his indisposition to his exceptive directionesto Vermo, which for two years past he thinks has been induced by a morbid state of his body. He has been married 3 years - was ero Connection with the Dex before his maniage - and altho he feels disgusted with his strong vermal propensities, he cannot resist them. I advised him to town sepe-- rate himself from his wife by bavilling

to him, that he perpetrated it in his Sleep, and "that he had no method 36 presenting it but by typing his hards to tie his hands behind him when he went to bed." Besides the des disheping effects of onanism in these letters, there are many others which you may see detailed by Do Tipot in his excellent little tract upon this Subject a I shall only add to them, that willing the year 1903 I have attended five young men who have been affected with manualy in Cording upon Joiotism in three of whom I discovered it to be the effect of this Viet, and in the other two I had strong reasons for beliving it to be indued by the same The excepive indulgence in

= which he did, but without experiencing any relief from his discuse. He has currently requested me to promerion render him inspotent, if I would not give him the Command of himself in any other way. I have tried sor eral resucties in his case; Erolting has done him any good except the Sugar of lead, which I was som obliged to lay aside from its producing a severe nervous Colie. He has urged me of late to constrate him delaring that his feelings of body &mind were horsid. wishing to know whether his Disease was not seated in his imagination only, Isashio hims to I asked him whether his qualification of his appointe were equal to his disires. He said that for 3 years past he had had five unneal Committions in Whom, and each time " Semine ejecto".

Denneal pleasures whether natural, or Certificial, produces in addition to all the morting phonomena which have been ener--meratio, a constant govorhor - afrifoshirt of food from the Sight of a worman Of this a case is related by Senvertus. a perpetual Discharge of Jensen without any existing course.
